

## CHOLE-CATH® Biliary Drainage Catheters with RO Marker NEPHRO-CATH™ Nephrostomy Drainage Catheters

- Tru-Set® leak-resistant locking system
- Biliary catheter with RO marker to facilitate accurate placement
- Ureflex-Soft® material for enhanced patient comfort
- Kink resistant
- Large skived drainage holes
- Large bore hub

**Biliary Catheter with Visible RO Marker**

- Radiopaque marker positioned at most proximal drainage hole is designed to facilitate accurate catheter placement.

**Ease of Insertion**

- Reinforced tip to help prevent catheter accordioning during insertion.
- Enhanced surface lubricity of UreSil Tru-Slide Plus™ hydrophilic coating facilitates catheter advancement and tracking.

**Patient Comfort**

- Ureflex-Soft catheter material is designed to provide enhanced patient comfort.

**Patency**

- Exceptional catheter material features inherent column strength, reducing risk of catheter buckling and kinking.
- Thin wall design, large skived drainage holes along with large bore hub provide excellent flow rates.

- Unique locking mechanism is leak resistant and provides secure fixation of the pigtail.
- Smooth, lubricious surface of the catheter's inner wall can help reduce encrustation.

**Percutaneous Nephrostomy Drainage**

**NEPHRO-CATH Nephrostomy Drainage Catheter with locking pigtail**
